Jabees P4

Jabees P4 is a power bank with LED light to display the battery capacity for charging the consumer electronic products with DC-5V input.

Overview of P4:

- (1) Power
- (2) LED lights
- (3) Torch
- (4) MicroUSB Input
- (5) USB Output

PRODUCT DESCRIPTION

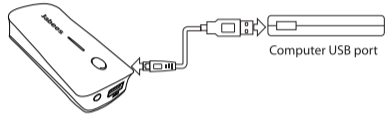

1. Palm size with 2A output for your CE devices such as Table, Smart Phone, PSP and so on.
2. Applying the constant voltage output control for battery protection. low noise, stable output, high efficiency, with a variety of self-protection functions.
3. Universal compatibility.

BATTERY CAPACITY DISPLAY

Press the POWER button once to display the battery capacity. 4 LED indication lights, each LED light means 25% power.

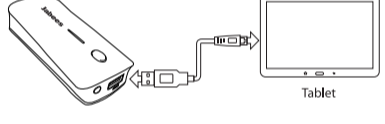

HOW TO CHARGE P4

Plug the microUSB cable into the microUSB INPUT of P4 and connect the other end to the computer or charger with USB port. The battery indication lights start blinking to indicate the charging status. The charging takes approximately 5 hours.

HOW TO CHARGE A DEVICE

Plug the microUSB cable into the USB OUTPUT of P4 and connect the other end to the device that you want to charge. P4 will be automatically turned on and start charging. If your device is not of the microUSB port, you can use its own USB cable to connect with P4 for charging.

HOW TO TURN ON AND TURN OFF THE TORCH

Double press the POWER button to turn on the torch. Every single press of POWER button after this will go to 'LED light flashes', 'SOS signal', and then 'LED torch turns off'.

| 50-75% | On | On | Flash | Off |
| 75-99% | On | On | On | Flash |
| 99-100% | On | On | On | On |

CHARGING STATUS

Charging the other device

- The LED light turns on, it is charging the other device.
- The LED light turns off, the device is fully charged.

Charging P4

- The LED lights show the battery capacity during charging. Please refer to the 'LED POWER INDICATOR WHEN CHARGING AND CHARGED'

- When all 4 LED lights are in solid blue, it means P4 is full charged.

Remark:

1. Jabees P4 is with the high quality Li-ion battery. If you find P4 doesn't work during the charging, please confirm whether the

cable is firmly connected, or you are using a correct charging connector. We suggest you to select Jabees or other qualified adaptor to make charging.

2. P4 has over-current protection circuit. If there is output short circuit, P4 will go into the idle state. You have to recharge P4 to get it back to the working state.

3. Every power bank has its power conversion loss. Its battery capacity is not always equal to its output charging capacity.

4. P4 is compatible with most of the mobile phones and electronic devices. If there is occasional compatibility problem with some devices, this will not be warranted.

SAFETY INFORMATION

Do not try to modify, tamper, alter or repair in any way by persons other than the technicians of FreeTek International

Co.,Ltd. or their assigned parties. Do not crash, open, puncture, or expose P4 to fire, high temperature, or water. You are required to use Jabees' charging adaptors or other qualified adaptors from reliable source. If you find battery inflation or other abnormal phenomenon, please stop using it and consult with the customer service center of Jabees (support@jabees.com). This product is not suitable to the persons with lower safety perception mentally or physically (including kids). Please place P4 out of reach by the kids.
