### Jabees P6

Jabees P6 is a power bank with LED light to display the battery capacity for charging the consumer electronic products with DC-5V input.

#### Overview of P6:

- (1) Power
- (2) LCD
- (3) TORCE
- (4) MicroUSB Input
- (5) USB Output 1A
- (6) USB Output 2.1A

### PRODUCT DESCRIPTION

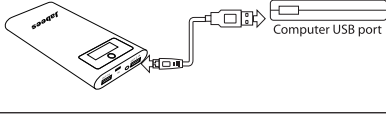

- 1. Palm size with 2 USB outputs for you to charge 2 devices at the same time.
- 2. Applying the constant voltage output control for battery protection. low noise, stable output, high efficiency, with a variety of self-protection functions.
- 3. Universal compatibility.

### BATTERY CAPACITY DISPLAY

Press the POWER button once to display the battery capacity. The battery capacity will appear in percentage on the LCD.

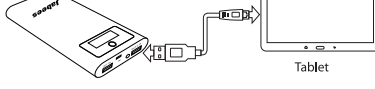

### HOW TO CHARGE P6

Plug the microUSB cable into the microUSB INPUT of P6 and connect the other end to the computer or charger with USB port. The LCD turns on and the remain battery capacity appears in percentage. The charging takes approximately 9 hours by the charger with 1A output.

### HOW TO CHARGE A DEVICE

Plug the microUSB cable into either USB OUTPUT 1A or USB OUTPUT 2.1A of P6 and connect the other end to the device that you want to charge. Press the POWER button of P6 once and it start charging the device. P6 is with 2 USB outputs, you can connect P6 with 2 devices and charge them at the same time. If your device is not of the microUSB port, you can use its own USB cable to connect with P6 for charging.

### HOW TO TURN ON AND TURN OFF THE TORCH

Double press the POWER button to turn on the torch. Double press and POWER button again to turn off the torch.

### CHARGING STATUS

#### Charging the other device

- When charging: The LCD turns on and shows the remain battery capacity in percentage. The 'OUT' and the output voltage also appear on the LCD.
- The LCD turns off when the device is fully charged.

#### Charging P6

- The LCD shows the battery capacity in percentage and the 'IN' is blinking during charging.

- When LCD shows the battery capacity in 100% and the 'IN' stops blinking, P6 is fully charged.

#### Remark:

- 1. Jabess P6 is with the high quality Li-ion battery. If you find P6 doesn't work during the charging, please confirm whether the cable is firmly connected, or you are using a correct charging connector. We suggest you to select Jabees or other qualified adaptor to make charging.
- 2. P6 has over-current protection circuit. If there is output short circuit, P6 will go into the idle state. You have to recharge P6 to get it back to the working state.
- 3. Every power bank has its power conversion loss. Its battery capacity is not always equal to its output charging capacity.

- 4. P6 is compatible with most of the mobile phones and electronic devices. If there is occasional compatibility problem with some devices, this will not be warranted.

### SAFETY INFORMATION

Do not try to modify, tamper, alter or repair in any way by persons other than the technicians of FreeTek International Co.,Ltd. or their assigned parties. Do not crash, open, puncture, or expose P6 to fire, high temperature, or water. You are required to use Jabees' charging adaptors or other qualified adaptors from reliable source.
